Let us help build your next custom dream home.

We have an in house designer who can assist you with any modifications or additions to your home plan. We construct homes from 1,000 to over 10,000 square feet. We will build on your lot, or choose one from our exclusive subdivisions. We have several newly constructed homes in our inventory that may meet your needs. Contact us for further information on homes and pricing.

Ask us about our fixed builders fee with no hidden cost or added charges. Unlike cost plus, the more you or your builder spends constructing your home, the more profit the builder makes. Cost plus building prices can skyrocket out of control. With our fixed fee, if you decide you want upgrades, you only pay for the additional costs, not the additional costs plus a builder's percentage.
